Dear Anoop Musale,

I am pleased to invite you to participate in an internship with the Department of Computer Science in the Watson School at Binghamton University.

Under the terms of our agreement, you will be sponsored to conduct research as a part-time, unpaid intern for the duration of approximately 3 months, from July 15, 2019 until October 18, 2019. During your period of internship, your faculty sponsor and contact at Binghamton University will be Dr. Leslie Lander. You are expected to work 21 hours/week remotely in a non-hazardous setting, on improving some of the web applications that the Computer Science Department has developed. You are expected to maintain a time-sheet and provide it to your advisor.

Binghamton University and the Department of Computer Science will not provide any compensation for this position; you will be responsible for all of your personal expenses during the period of the internship, including expenses for transportation, housing, meals, and medical insurance. You will not be entitled to a paid position with Binghamton University at the conclusion of the internship.

You shall be solely responsible for your acts or omissions in connection with the internship. This internship is contingent upon your satisfaction of eligibility requirements for training under US Department of Homeland Security regulations. Prior to the start date of the internship program, you must contact an Advisor at the office of International Scholar and Student Services.

The University Federal ID is 14-6013200

Sincerely,

Leslie Lander
Graduate Director and Associate Professor
